ANSHUL JAIN

DATA ANALYST | DATA SCIENCE | BUSINESS INTELLIGENCE

Gurugram, India • LinkedIn • GitHub

PROFESSIONAL SUMMARY

Data Analyst with experience across data analytics, business intelligence, survey analytics and reporting automation. Skilled in using SQL, Python, Advanced Excel, Power BI and Tableau to prepare, analyse and communicate data-driven insights. Experience includes employee engagement survey support, HR and recruitment analytics, business reporting, data validation and ETL workflows. Interested in applying statistical analysis, predictive analytics and machine learning to practical business problems.

CORE SKILLS

Data & Querying	SQL, MySQL, PostgreSQL, SQL Server
Analytics & Programming	Python, Pandas, NumPy, EDA, Statistical Analysis
BI & Reporting	Power BI, Tableau, Advanced Excel, Dashboard Development
Data Science	Machine Learning Fundamentals, Predictive Analytics, Scikit-learn
Data Platforms	ETL, BigQuery, Azure, AWS, PySpark, Databricks

PROFESSIONAL EXPERIENCE

Specialist – Career Consulting Delivery

Marsh McLennan | May 2026 – Present

• Support global employee engagement survey projects, including questionnaire setup, testing and deployment.
• Work with survey and HR datasets, supporting analysis and reporting using Excel, SQL and Python.
• Contribute to reporting and visualisation workflows using Power BI and Tableau.
• Perform data validation and support reporting automation to improve data quality and delivery consistency.

Data Analyst

K-Tek Talent Solutions LLP | January 2022 – June 2025

• Developed Power BI and Tableau dashboards to track HR and recruitment metrics, hiring trends and workforce allocation.
• Automated data extraction, cleaning and transformation workflows using SQL and Python.
• Performed exploratory data analysis and statistical analysis to identify patterns and support business decisions.
• Used SQL, Python and Advanced Excel for reporting, data validation and actionable business insights.

EDUCATION

Bachelor of Arts (B.A.) | Jiwaji University, Gwalior | 2017 – 2020

SELECTED PROJECT WORK

Blinkit Sales Analysis: Power BI dashboard with DAX-driven KPIs for sales and product performance.
Customer Churn Analysis: Python-based exploration of customer churn patterns and retention factors.
Riskified Fraud Detection: Python analysis of transaction data to explore fraud patterns and order approval logic.
HR SQL Analysis: SQL analysis using joins, aggregations and window functions.
